

**CONFIDENTIAL**

Save the Rainforest!

**Mission:** Where is the Rainforest?

### **PROBLEM!**

- Oh no Explorers! It seems that Professor Wild has forgotten the map to the rainforest in my office! We need your help! We must get to the rainforest immediately to start our mission to Save the Rainforest!

### **Task:**

- Identify 3 tropical rainforests on your blank map
- You must label your map completely!
- Some things to remember to include are:
  - Continents
  - Oceans
  - Longitude lines
  - Latitude lines
  - Compass rose
  - Map Key
  - Map Title
- Include a symbol for your starting point (home) and a symbol for each of the rainforests. Connect the symbols to create 3 possible paths to the rainforest! Professor Wild can't decide which rainforest he wants to go to!
- After you have completed your maps, you must present them to your fellow Explorers so that everyone can know about the different locations of the rainforest! You will find out later which one Professor Wild decided to take you to!

## **Good Luck Explorers!**

**-Professor Wild & Samantha**
